Withdrawals

Guaranteed income

Income Base: The Income Base is used only to determine fees and income payments under this package. It is not a value that can be surrendered or withdrawn.

- **Option to receive scheduled income for life** as Guaranteed Withdrawal Payments (GMWB), assuming no excess withdrawals and a life-only annuity payout option is chosen at maturity.
- **Withdrawal payment amount determined by Income Base** at the time payments begin, calculated as the greatest of:
 - ▶ **Premiums paid in the first year accruing for up to 10 years or age 85 or when withdrawals begin at the current 2.75% GMWB annual roll-up rate**
 - ▶ **Premiums paid in the first year accruing for up to 10 years or age 85 or when withdrawals begin at the current 2.75% GMWB annual roll-up rate plus the add-on rate**

The add-on rate is the sum of the values (a x c)/b, for all interest crediting options to which account value is allocated at the end of a Contract year, where:

- a Is the interest crediting option account value at the end of the Contract year before interest is credited.
- b Is the account value at the end of the Contract year before interest is credited.
- c Is (i) the current fixed interest rate for that Contract year; (ii) the indexed crediting option's interest rate for the indexed crediting option on that Contract anniversary; or (iii) zero (0) for indexed crediting options where the index crediting period has not ended.

During the Accumulation Period the Income Base can grow as defined above, adjusted proportionately for any withdrawals you may take prior to beginning the Guaranteed Withdrawal Payments. If the Income Base grows, your Guaranteed Withdrawal Payment will also grow until the point income is elected.

During the Accumulation Period, you may elect to “restart” a new 10-year roll-up period. Restarting a new 10-year period extends the Accumulation Period and continues the growth of the Income Base at the annual roll-up rate.¹

¹ F&G reserves the right to change the GMWB roll-up rate upon restart.
The roll-up rate is not to be less than the guaranteed rate of 2%. Restart is not available in all states. Please refer to SalesLink for state availability.

Starting Percentage

- **When payments are turned on, the amount is a percentage of the total Income Base:**

	At Age 50	After Age 50
If single annuitant	3.35%	Increases by 0.5% every 5 years to age 85 (at age 85+the percentage stays at 6.85%)
If joint annuitant	2.85%	Increases by 1% every 10 years to age 80 (at age 80+ the percentage stays at 5.85%)

If the annuitant meets qualifications for impairment and the account value > \$0, payments increase 2X (1.5X if joint contract):

- ▶ **The Enhanced Guaranteed Minimum Withdrawal Benefit Rider** has been in effect for three years. Not available in HI or IL.
- ▶ **No premiums have been paid for the last three years**
- ▶ **The annuitant is unable to perform at least 2 of 6 activities of daily living²,** certified by a licensed physician, and requires the care of a licensed caregiver
- ▶ **The impairment began at least one year after contract issue,** and is expected to be permanent
- ▶ **The annuitant is 60 years or older and a U.S. resident**

Increased payments for annuitants who are impaired revert to their original level if the account value is depleted OR the impairment ends.

² Annuitant in AK, AL, ID, MN, MS, MT, OR, PA, PR or WA could also qualify by being in a Qualified Care Facility for 60 days.

Death benefit

The account value, including total vesting bonus, is paid as a lump sum benefit.

- ▶ No surrender charges or MVA applied

Free partial withdrawals

Each contract year after year 1 may withdraw $\leq 10\%$ with no surrender charge or Market Value Adjustment (MVA). Withdrawals may be taken as:

- Systematic withdrawals on monthly, quarterly, or semi-annual basis; or
- Up to 4 non-systematic withdrawals per year.

Surrender charge percentages— for withdrawals in year 1, or withdrawals $> 10\%$ in years 2-10

Contract Year	1	2	3	4	5	6	7	8	9	10	11+
All states where approved except as noted below (see state approval chart)	14%	13%	12%	11%	10%	8%	6%	4%	2%	1%	0%
AK, AL, CA, DE, FL (65+), ID, MA, MN, MS, MT, NJ, NV, OH, OK, OR, PA, PR, SC, TX, UT, WA	9%	9%	8%	7%	6%	5%	4%	3%	2%	1%	0%
IN follows this schedule	12%	11%	10%	9%	8%	7%	6%	5%	4%	3%	0%

Any time a withdrawal incurs a surrender charge, an MVA will be made. For withdrawals above the annual penalty free withdrawal amount for the purpose of a required minimum distribution, F&G will waive any surrender charges and market value adjustments.

The MVA is based on a formula that takes into account changes in rates since contract issuance. Generally, if rates have risen, the market value adjustment will decrease surrender value; if rates have fallen, it will increase surrender value. MVA does not apply in AK, AL, ID, IL, MN, MO, MS, MT, OR, PA, PR or WA.

For unexpected health care costs— access to vested account value with no surrender charge or MVA

Home Health Care (provided by licensed home health care provider)

- Care must begin at least 1 year after contract effective date
- Must be unable to perform at least 2 of 6 activities of daily living (for at least 60 days and expected to continue for at least 90 days after requesting withdrawal)
- Not available in MA

Nursing Home Care (in a licensed nursing home)

- Confinement must begin at least 1 year after contract effective date
- Must be confined to nursing home for at least 60 days
- Not available in MA

Terminal Illness

- Diagnosis must be made at least 1 year after contract effective date and certified by licensed physician
- Life expectancy must be less than 1 year

Spouse Continuation

If the rider is in the Accumulation Period on the date of the first owner's death, this rider will continue if your client's spouse continues the contract. Should the policy later enter the Withdrawal Period, the Guaranteed Withdrawal Payments will be based on the life of the surviving spouse.

If the rider is in the Withdrawal Period on the date of the first owner's death, and the spouse was a joint annuitant under the contract, Guaranteed Withdrawal Payments will continue based on the same annuitant's age as it was at the time of owner's death.

Fees

1.30%
of the Income Base on each contract anniversary.
Upon restart, the fee is guaranteed not to exceed 1.50%

In calculating the level of the Index, the index methodology deducts a maintenance fee of .85% per year, calculated daily. This fee will reduce the level of the Index and thus the amount of interest, if any, that will be credited to any Product. Furthermore, while the volatility control applied by CIBC as part of the index methodology may result in less fluctuation in rates of return as compared to indices without volatility controls, it may also reduce the overall rate of return for products referencing the Index as compared to other indices not subject to volatility controls. Volatility control seeks to provide smoother returns and mitigate sharp market fluctuations. While this type of strategy can lessen the impact of market downturns, it can also lessen the impact of market upturns, potentially limiting upside potential.
