Surrender charge schedule

A competitive initial interest rate is guaranteed for the 5-year guarantee period. After the initial guarantee period, the annuity will immediately enter into a new guarantee period crediting a renewal fixed interest rate. At the end of any guarantee period, contract holders will have a 30-day window to withdraw some or all of their account value free of surrender charges and MVA. Beyond the 30-day window, a new set of surrender charges¹, identical to those in the initial guarantee period, will apply. Unless there is a full surrender, this renewal process will continue until annuitization or death.

Years into guarantee period	1	2	3	4	5
Surrender charge %	9%	8%	7%	6%	5%

The surrender charge will be 9% in the first year decreasing throughout each rate guarantee period by 1% each contract year. Upon renewal into a new rate guarantee period, surrender charges will reset to 9%, and will follow the identical decreasing pattern through each subsequent guarantee period.

Surrender charge schedule

(continued)

Any time a withdrawal incurs a surrender charge, an MVA will be made.

The MVA is based on a formula that takes into account changes in U.S. Treasury yields since contract issuance. Generally, if treasury yields have risen, the market value adjustment will decrease surrender value; if treasury yields have fallen, it will increase surrender value. MVA does not apply in CA or NJ.¹

For NV and TX, there is an additional option at the end of any guaranteed period to renew the annuity into a one-year guarantee period with no surrenders or MVA.

¹ For the following states, surrender charges and MVA continue to decline over 10 years and do not restart at 9%: CA, CT, ID, NC, NJ, OK, VT

For unexpected health care costs — access to account value with no surrender charge or MVA
